

Morpheus ↗

Cyberbullying affects 1 in 10 children. In 2019, 36% of U.S. university students were in distance learning, and by 2021, the number increased by 74%. These stats emphasize the need for safety measures in online education to protect students.

THE ISSUE

The presence of harmful or inappropriate language in discussion forums, chat rooms, and collaborative projects can disrupt the learning environment and negatively impact students.

Online platforms can foster cyberbullying, causing emotional distress and harming academic performance.

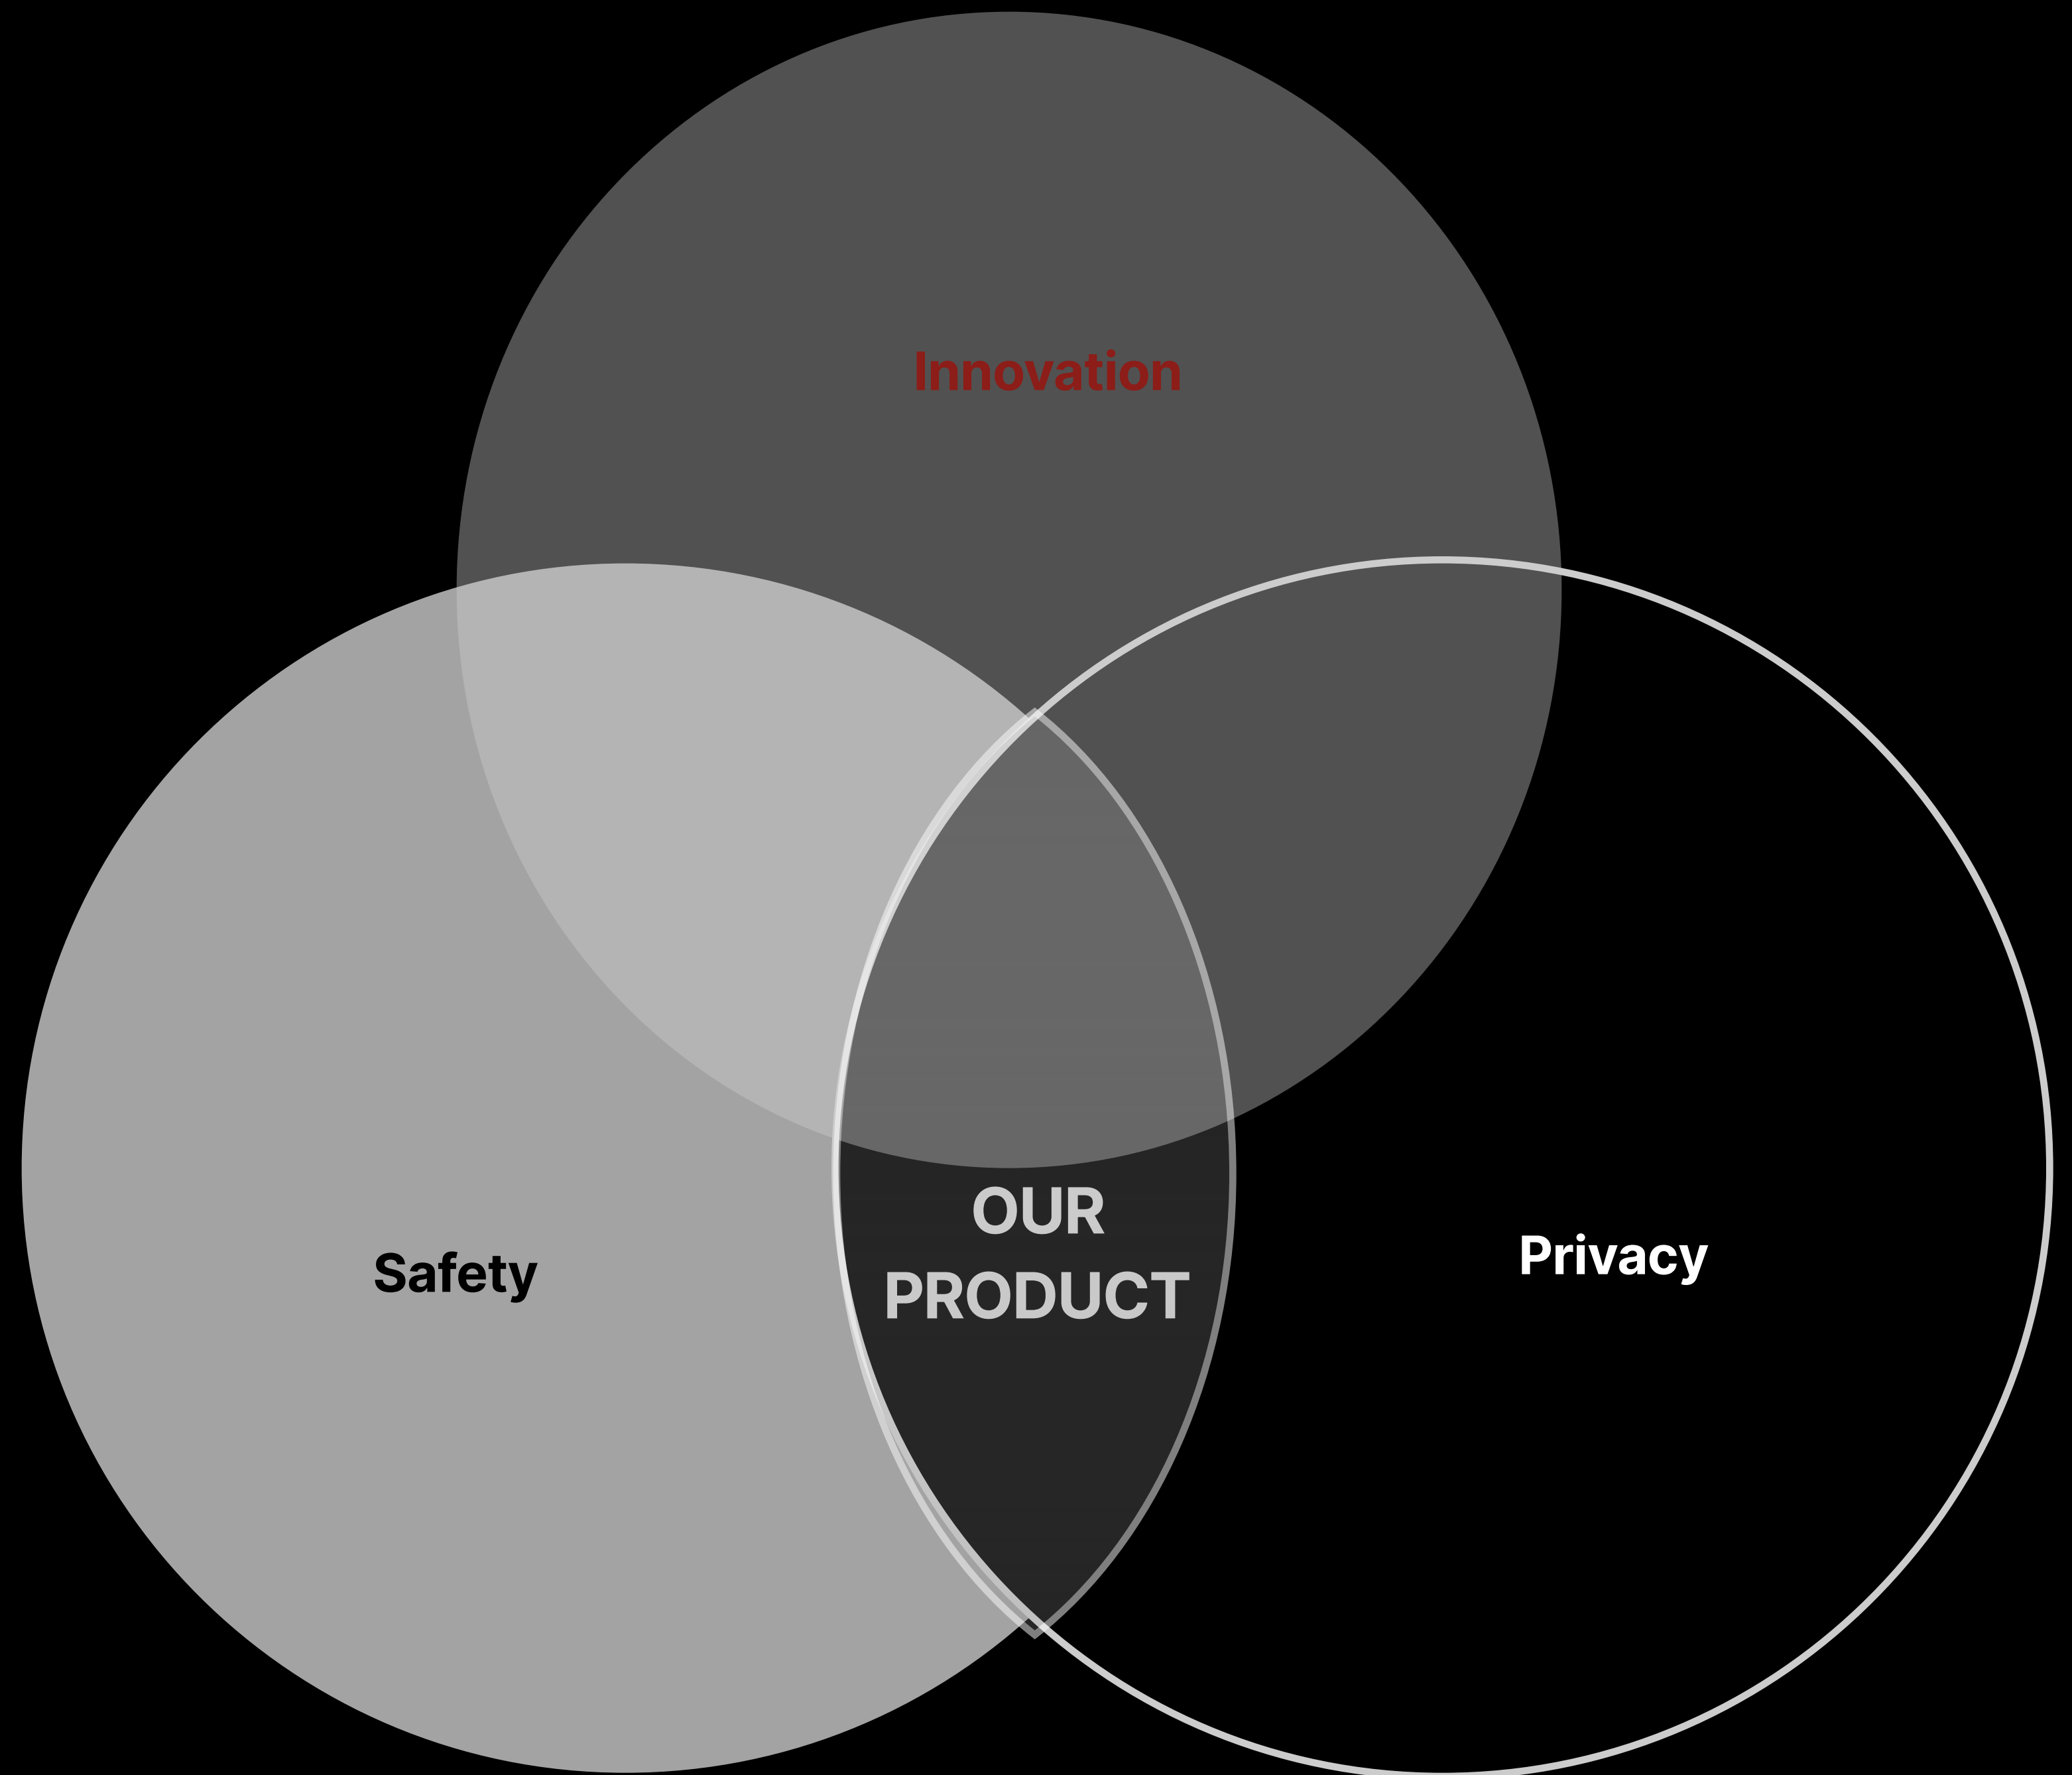

**Inappropriate
Content**

Cyberbullying

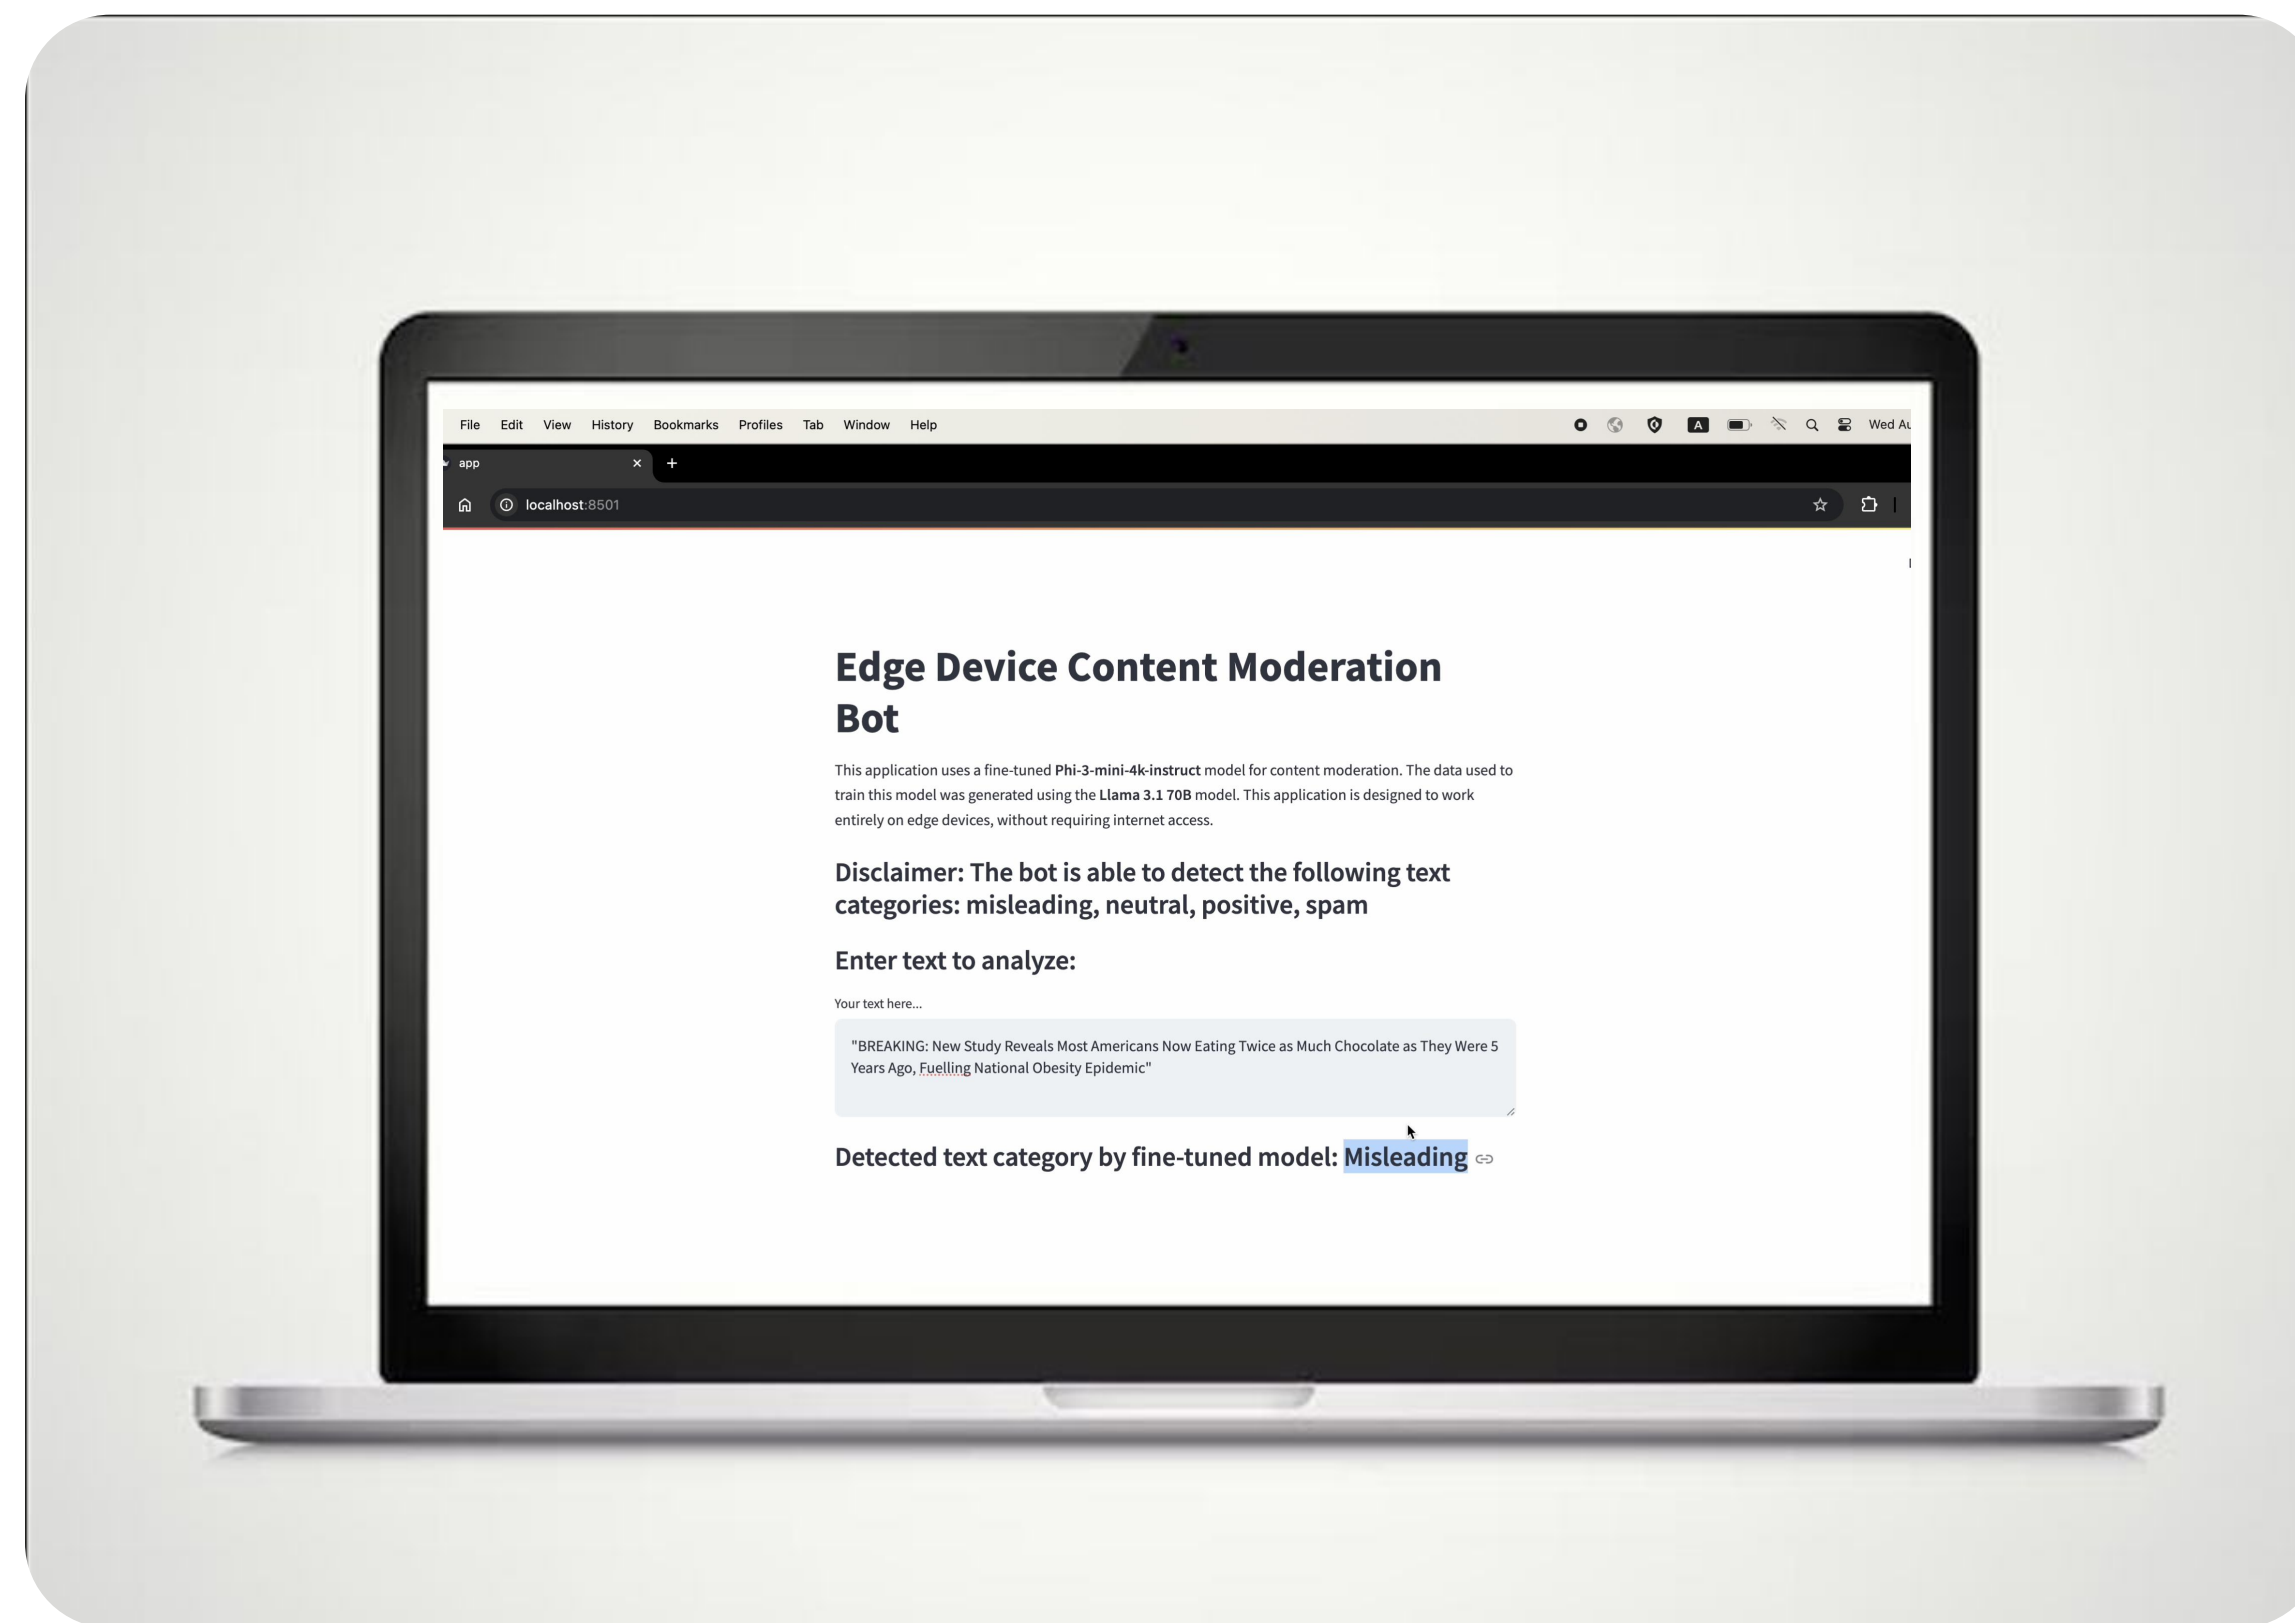

Our **Vision**

1. Ensuring real-time content moderation
2. Promoting inclusivity and safety
3. Offering productive online learning environment.
4. Protecting student privacy

Introducing **SafeEdge**

A Real-Time Content Moderation for Educational Platforms

SafeEdge provides real-time content moderation for educational platforms, filtering inappropriate language. Deployed on edge devices, it ensures privacy and compliance with data protection regulations, creating a safe learning environment.

Offline Capability

Highly accessible and functional in limited or no internet connectivity.

Lightweight and Optimized for Edge Devices

Model optimized for efficiency on edge devices, ensuring smooth operation in resource-constrained environments.

UNIQUENESS

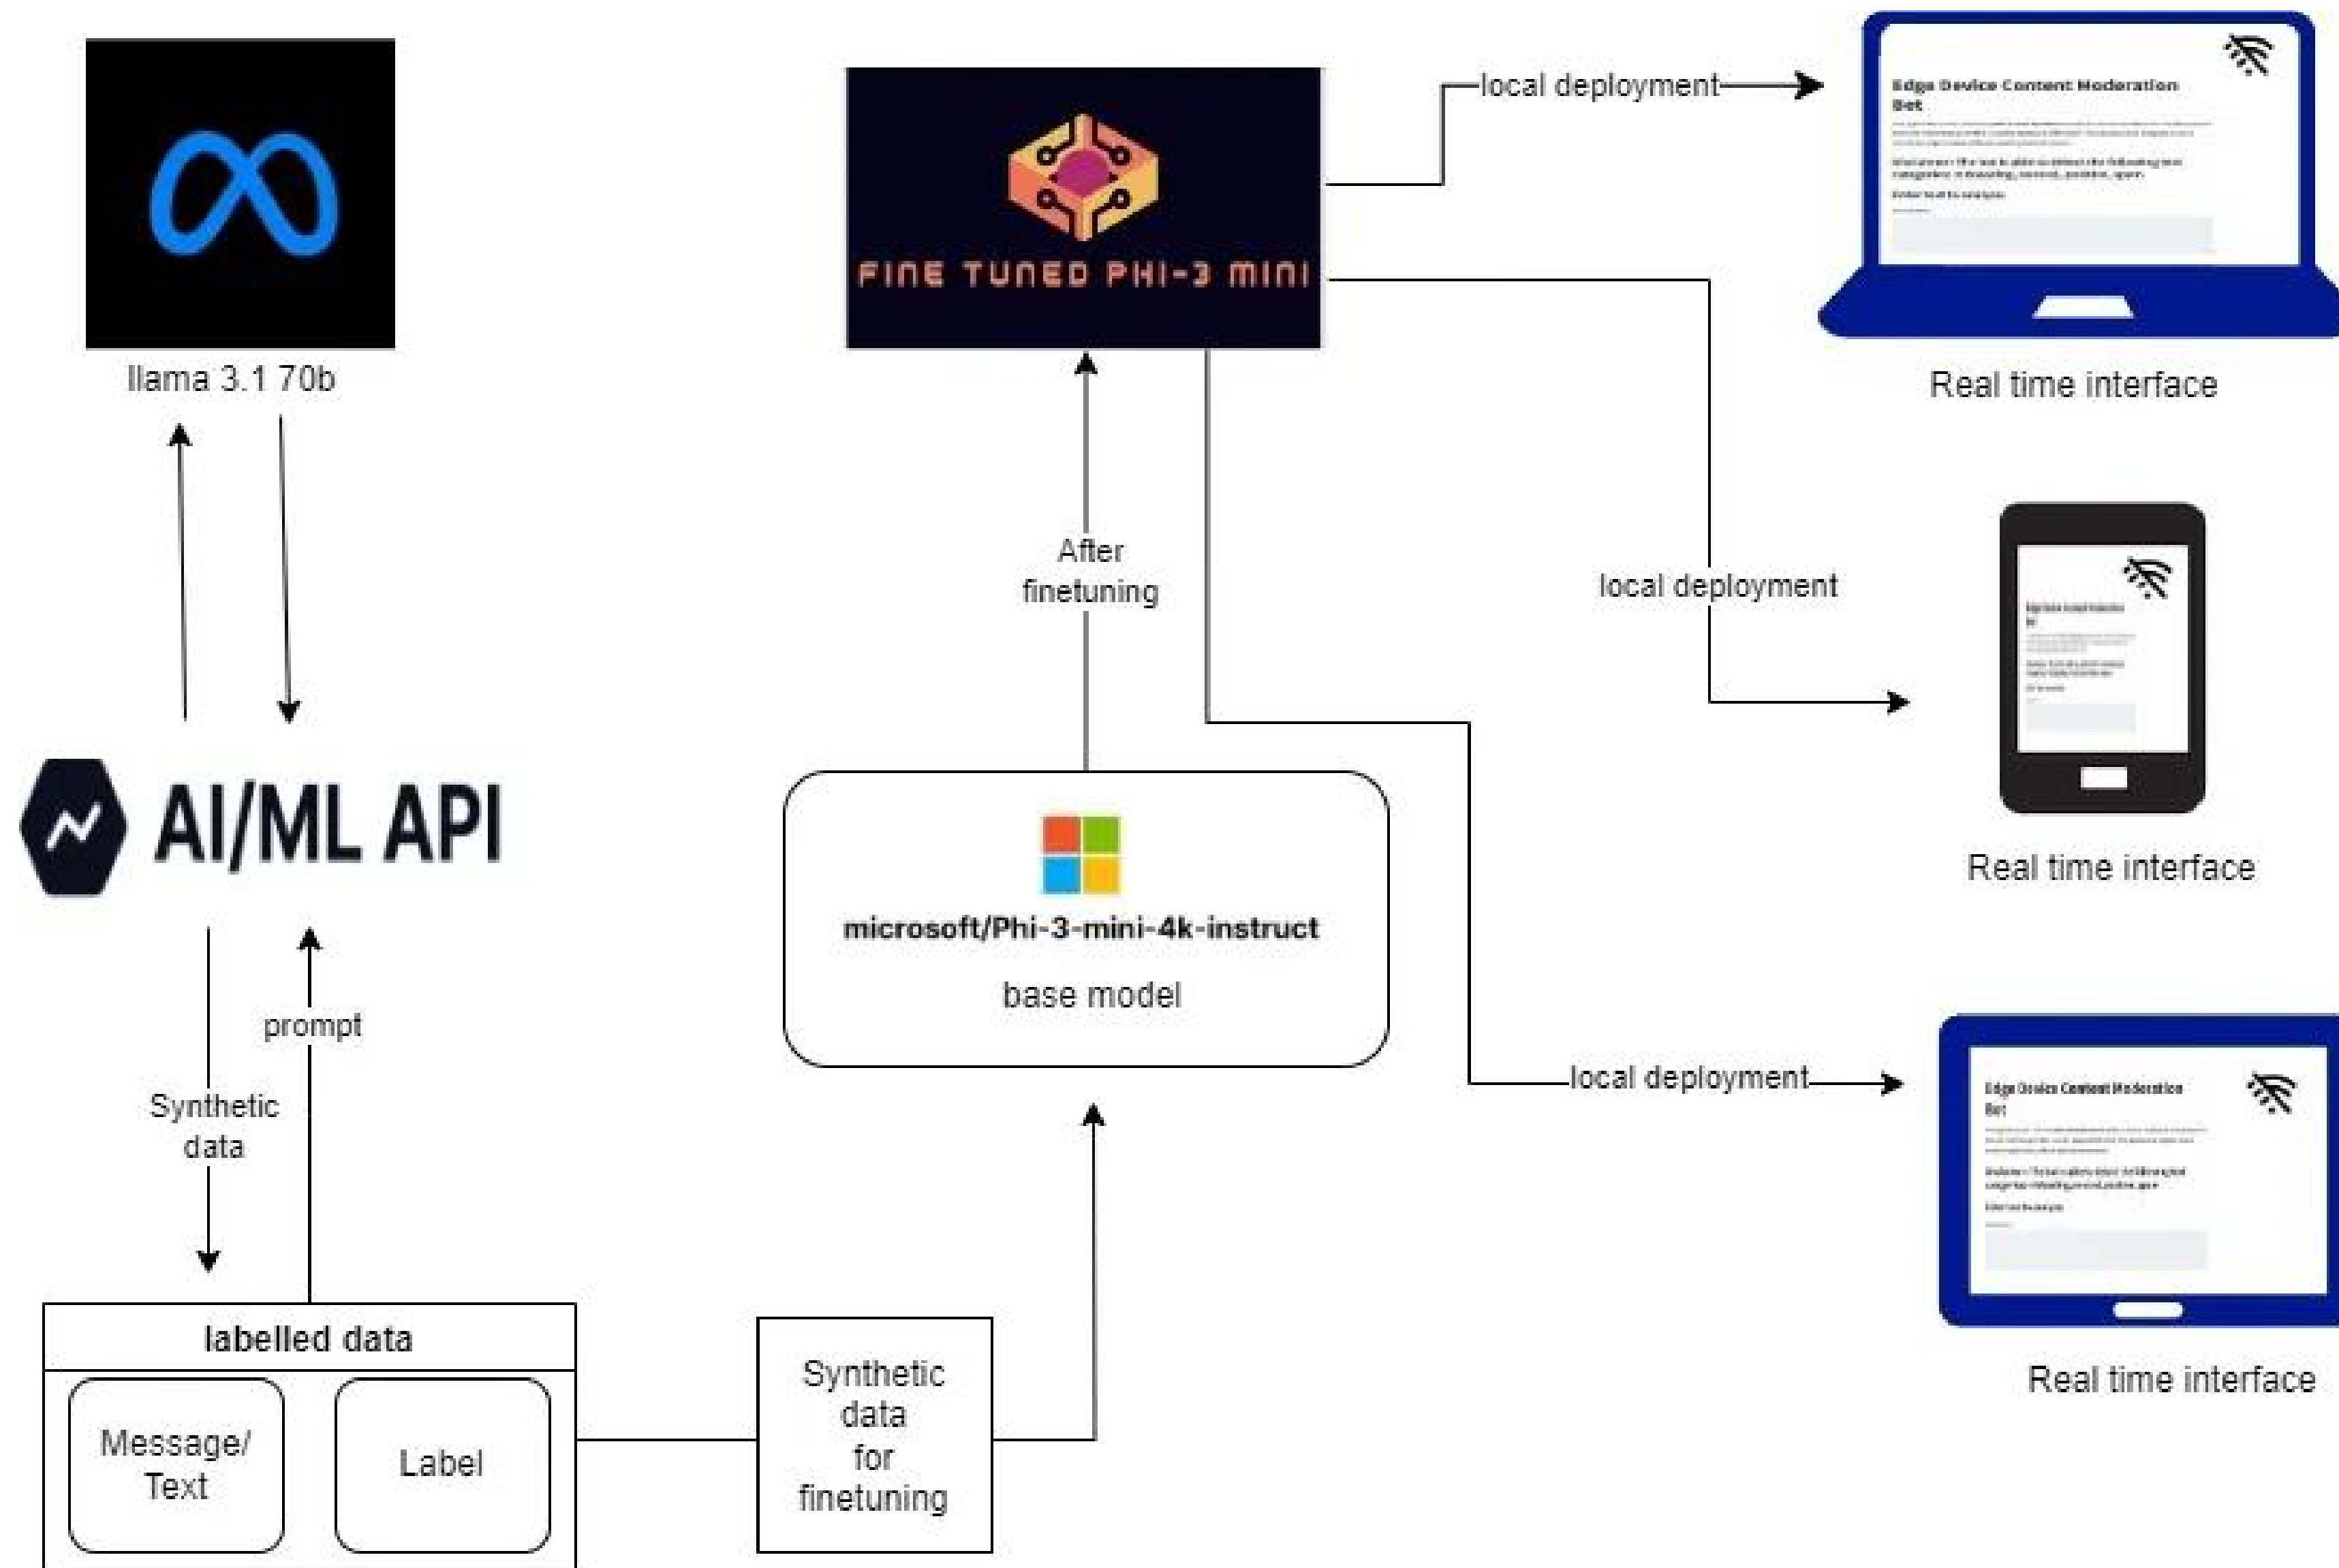

User-Friendly Interface

Streamlit app designed with a simple interface for easy text input and category predictions.

Open Source and Customizable

Community-driven product for rapid improvements and customizable model fine-tuning.
